True Handleless

Fitting Guide 2026

IMPORTANT – PLEASE NOTE

The information contained in this literature is for illustrative purposes only to assist in choosing your desired kitchen. While we endeavour to keep the information up to date and correct, we do not make any representations or warranties (express or implied) about the completeness, accuracy, reliability, or suitability of the doors and products shown.

We aim to showcase as many different items as possible. Some products have been installed and photographed purely to display various product features and should not be taken as examples of real kitchen installations.

Installation Responsibility

It is the installer's responsibility to check the manufacturer's installation and technical information to ensure:

The products are up to date.
They can be fitted as displayed.
They are suitable for your requirements.

We exclude any liability unless products are fitted in accordance with:

The specifications we supply.
The manufacturer's installation recommendations.
The manufacturer's technical information.

Product Information & Updates

The information shown in this literature is accurate at the date of print/release, but it may be subject to change. Please check with us to ensure you have the most current product information before making a purchase.

Colour Variations & Ageing

All products we sell are covered by a statutory warranty.
Natural ageing may cause slight variations in colour over time.
Identical colour matching cannot be guaranteed for replacement products from the same line.
In such cases, our liability is limited to the purchase price of the product being replaced.

Colour Representation & Board Matches

Due to photographic limitations, colours may differ slightly from actual products.
Board matches listed with doors are suggestions only—better matches may be available.
It is the customer's responsibility to determine suitability.

Final Note

The information in this literature is accurate at the time of print but may change. Please ensure you are viewing the most up-to-date product information and contact us if you have any doubts about suitability or accuracy.

TRUE HANDLELESS PROFILE OVERVIEW

The diagram below shows the key components of the Better Kitchens True Handleless kitchen system. It highlights how the profiles and joints fit together to create a seamless, handle-free design.

Colour Availability

Finish / Material Aluminium	The Better Kitchens range of True Handleless profiles is available in six colour options, allowing you to match or contrast with your kitchen design.
	
Brushed Silver	Brushed Copper
	
Brushed Bronze	Brushed Brass
	
Anthracite	Brushed Black

Top Profiles

Finish / Material
Aluminium

Top Profiles
Used at the top of base units, below the worktop.

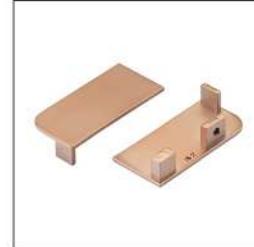

Top Profile

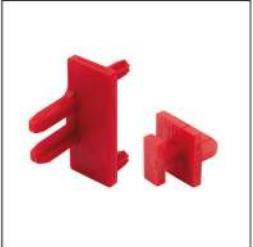

Top External Corner

Top Internal Corner

Quick Fix Brackets for Top & Mid Profiles

Finish / Material
Plastic

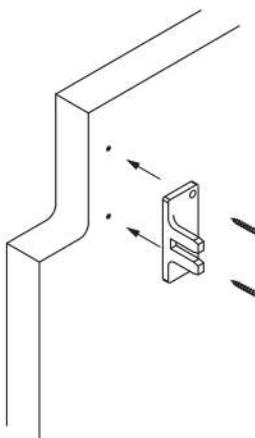

Dimensions
N/A

Accessories
N/A

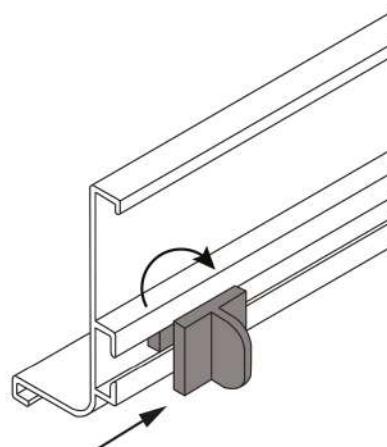

- Screw mounted brackets for top and mid profiles.
- Comes in pairs.

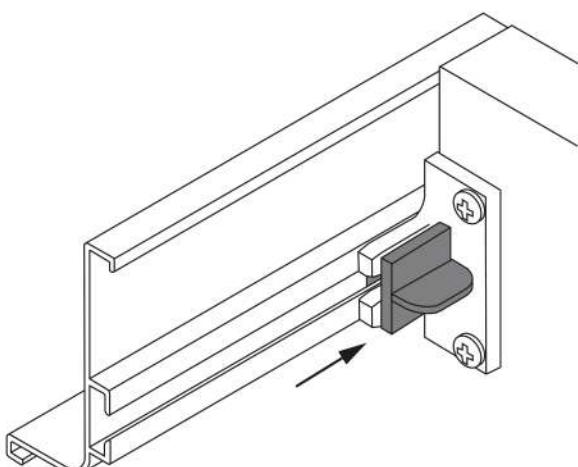

FITTING TOP AND MID PROFILES

Step 1.
Attach quick fix brackets to routed cabinet gables using screws.

Step 2.
Slide the connectors into the back of the profile and turn 90 degrees.

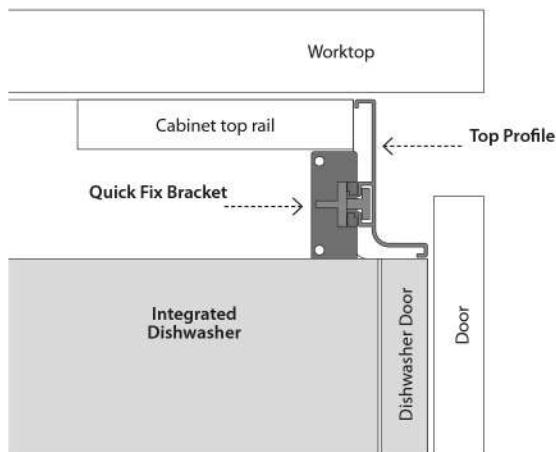

Step 3.
Apply profile to routed cabinet and push connectors into brackets to secure the profile to the cabinet.

Integrating Under Counter Appliances

Integrated Dishwasher

- The Top Profile can be used to run above an integrated appliance.
- It is recommended to **set integrated dishwasher height at 815mm** and adjust carcase legs to a min. height of 155mm. Please note, these dimensions are based on standard height dishwasher. Cabinet legs may need to be raised further if appliance height is different.
- Metal brackets (supplied with dishwasher) should be fixed to the outer face of adjacent cabinets. Please note, an additional bracing baton may be required to the rear of the machine to help reduce movement.
- If drawers are situated next to an integrated appliance, we recommend using end caps to cover any gaps.

IMPORTANT

We recommend extending the cabinet legs to a minimum height of 155mm to ensure the integrated dishwasher will fit easily.

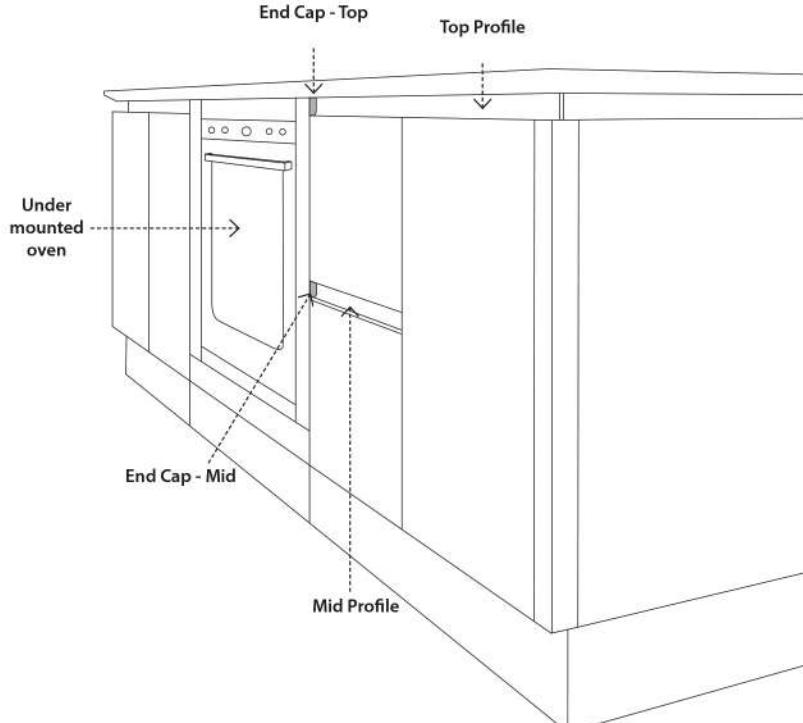

Always check the minimum height of your under-counter appliances before installing your Better Kitchens True Handleless kitchen to ensure there is enough clearance under the top rail.

Undermounted Oven

The Top Profile can't be used in conjunction with an undermounted oven. Profiles must stop on each side of the appliance and can be finished with end caps.

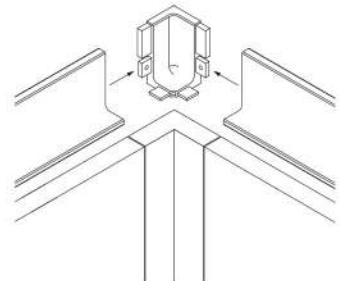

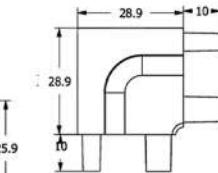

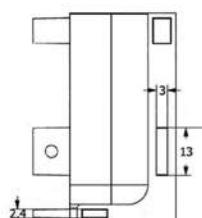

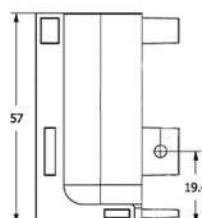

If using a freestanding cooker, end panels will need to be fitted on either side of the appliance, and the profile finished against the panel.

Internal Corner Joint - Top Profile

Finish / Material
Aluminium

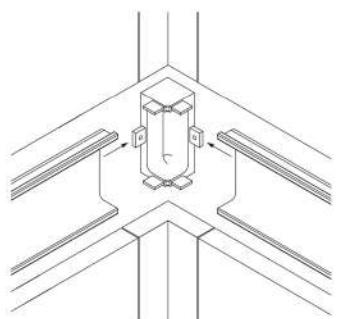

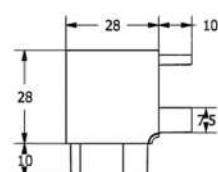

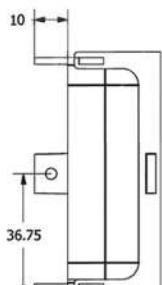

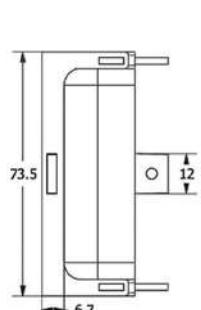

- Used to connect two top profiles at an internal corner, to be used together with an internal corner post.
- Secured to the top profile using two screws (supplied).

Internal Corner Joint - Mid Profile

Finish / Material
Aluminium

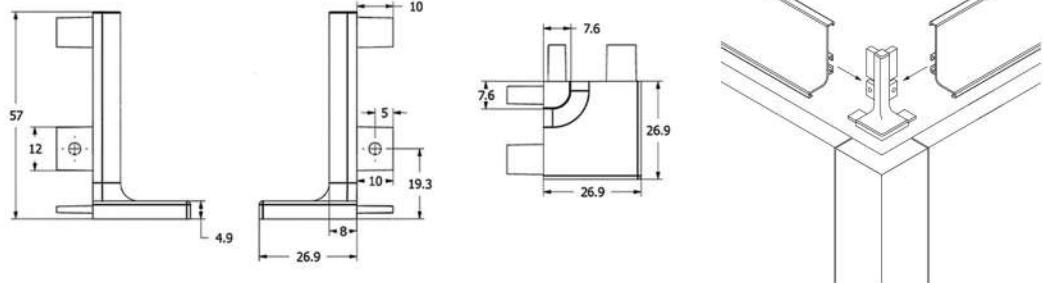

- Used to connect two mid profiles at an internal corner, to be used together with internal corner posts.
- Secured to the mid profile using two screws (supplied).

External Corner Joint - Top Profile

Finish / Material
Aluminium

- Used to connect two top profiles running around an external corner or an island unit, to be used together with an external corner post.
- Secured to the top profile using two screws (supplied).
- Nb.** A cut out needs to be made on the routed gable end to accommodate the screw heads behind the external corner joint (see Diagram 1 below).

External Corner Joint - Mid Profile

Finish / Material
Aluminium

- Used to connect two mid profiles running around an external corner or an island unit, to be used together with external corner posts.
- Secured to the mid profile using two screws (supplied).
- Nb.** A cut out needs to be made on the routed gable end to accommodate the screw heads behind the external corner joint (see Diagram 1 below).

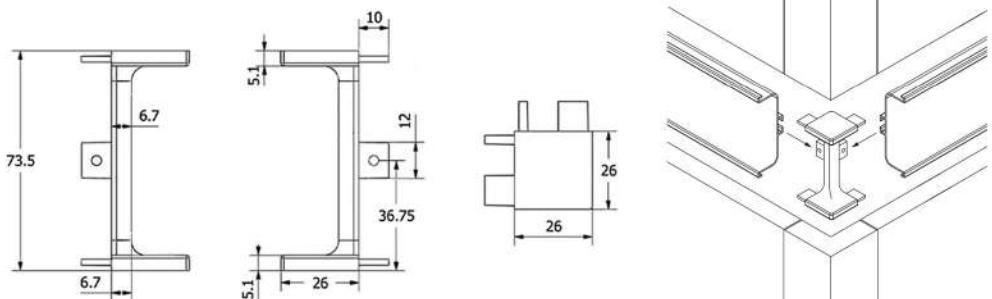

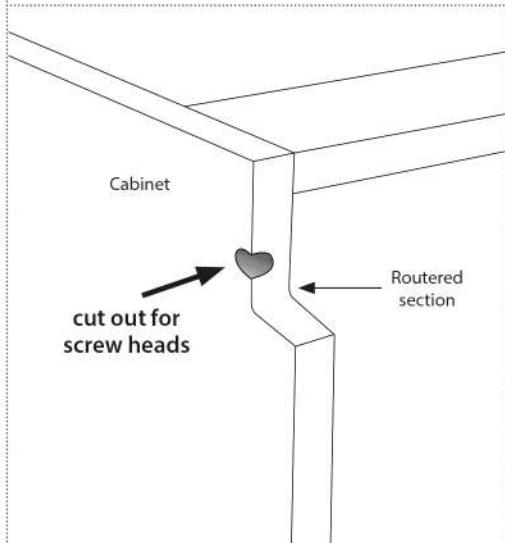

DIAGRAM 1

Before applying the corner joints to the cabinets, a hole needs to be notched out of the routed gable end to accommodate the two screw heads at the back of the corner joints.

End Plate - Top Profile

Finish / Material Aluminium	<ul style="list-style-type: none">Used at the end of a top profile for example against a wall, end panel or next to appliances such as under mounted oven.Secured to the top profile using a grub screw (supplied). Grub screw secured with Allen key.When using end caps, a 2mm spacing must be taken into account when cutting down the trim.

End Plate - Mid Profile

Finish / Material Aluminium	<ul style="list-style-type: none">Used at the end of a mid profile for example against a wall, end panel or next to appliances such as an under mounted oven.Secured to the mid profile using a grub screw (supplied). Grub screw secured with Allen key.When using end caps, a 2mm spacing must be taken into account when cutting down the trim.

Vertical Profile - Double Door (Intermediate)

Finish / Material
Aluminium

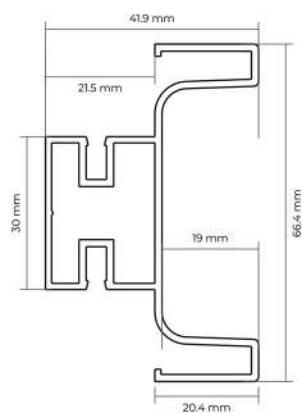

Dimensions
2550 x 66.5 x 30mm

Accessories available
Appliance Spacer Profile
30mm Rear Spacer

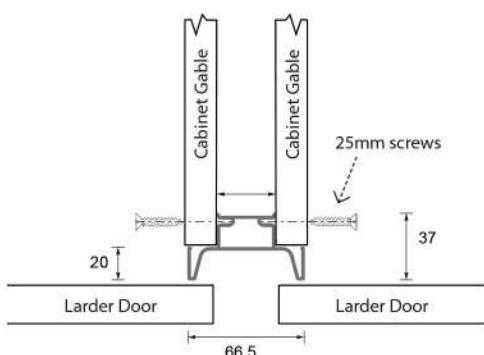

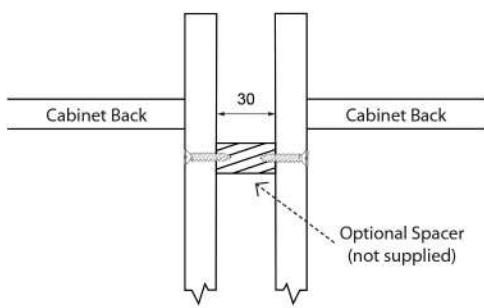

- Used on tall units when two opening doors meet.
- Secured to cabinet gables with 25mm cabinet screws.
- Can be cut to size using a circular chop saw.
- A 30mm spacer (not supplied) is required at the back between the two cabinets to maintain the void created by the profile trim.
- The front of the cabinet gables need to be set back by 20mm for the trim to overlap behind the doors.

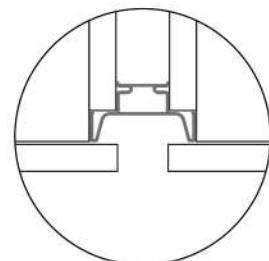

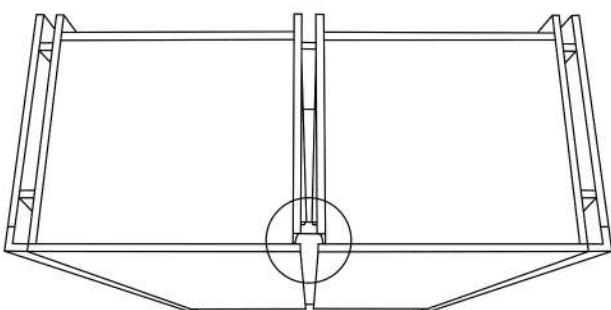

DIMENSIONS

FITTED DETAIL

APPLICATION BETWEEN TWO DOORS

Vertical Profile - Single Door (Lateral)

Finish / Material
Aluminium

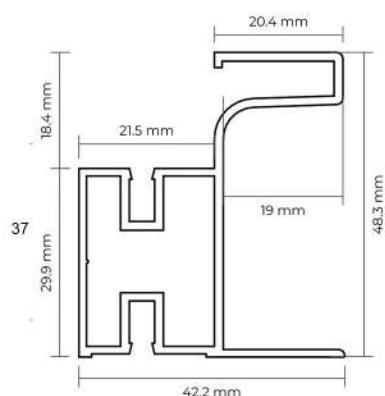

Dimensions
2550 x 48.3 x 30mm

Accessories available
Appliance Spacer Profile
30mm Rear Spacer

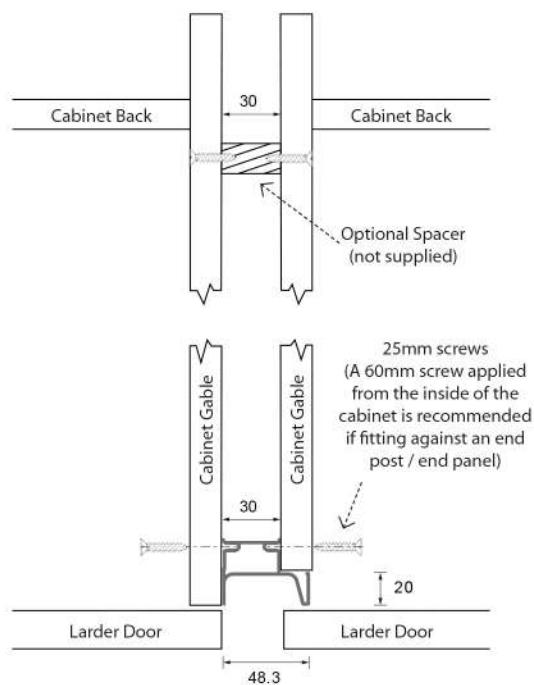

- Used on tall units when you have an opening door on one side only, can also be used to end a run where an end post or end panel is fitted.
- Secured to cabinet gable with 25mm cabinet screws.
- Can be cut to size using a circular chop saw.
- A 30mm spacer (not supplied) is required at the back between two cabinets or between a cabinet and end panel.
- The front of the cabinet gable needs to be set back by 20mm for the trim to overlap behind the door.
- To fix an end post or end panel to the profile you need to drill through the screw support channel and attach the end post from the inside of the cabinet with a 60mm screw.

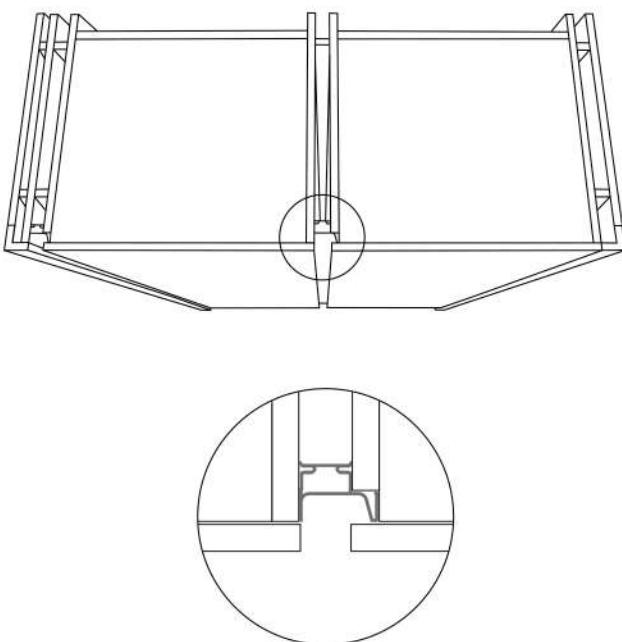

DIMENSIONS

FITTED DETAIL

APPLICATION BETWEEN TWO DOORS

Vertical Profile - Appliance Spacer

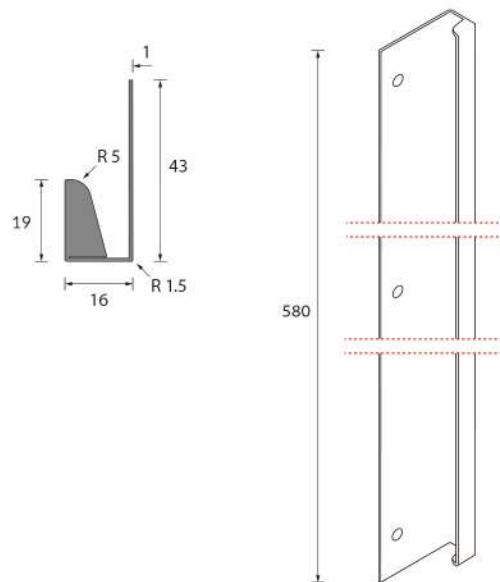

Finish / Material
Aluminium

Dimensions
580 x 43 x 16mm

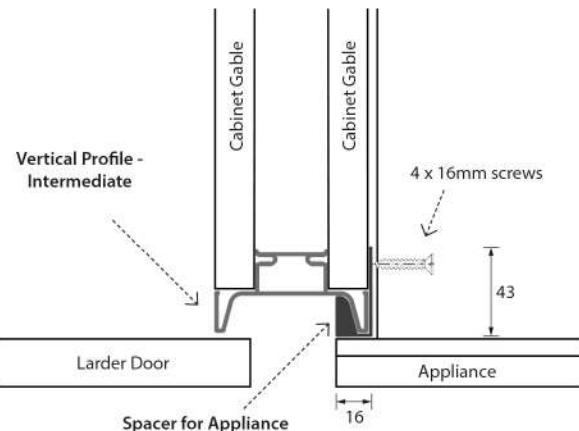

- Used to conceal the space behind the front of an appliance when used in an appliance housing unit combined with vertical profiles.
- Fixed into the cabinet gable with 3 screws (4 x 16mm).
- Works with both intermediate and lateral vertical profiles.
- The trim can be cut down to suit different sized appliances. If doing so, we recommend that a metal file is used to remove any sharp edges on the cut edge and that it is positioned out of sight.
- If the appliance requires a screw fixing into the cabinet, the spacer can be drilled into to accommodate the screws.
- Nb.** When stacking appliances, we recommend leaving a 10mm gap to the top and bottom of both appliances.

INSTALLATION

Better Kitchens True Handleless Wall Units

Finish / Material

MFC

Built in to the cabinet Structure

Dimensions

18 x 20mm

Accessories

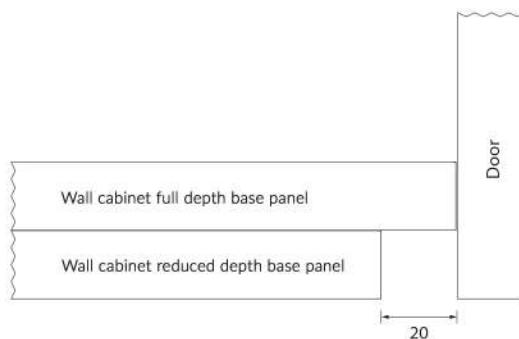

N/A

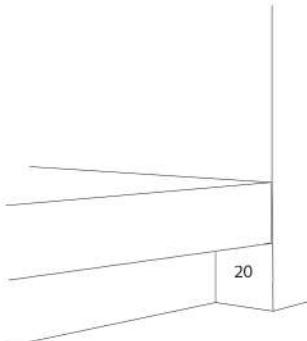

Our True Handleless wall units are designed for seamless integration without the need for additional parts. Each unit features two base panels, with the bottom one reduced by 20mm in depth to create a discreet finger groove.

This clever design allows for easy opening while remaining completely hidden when the door is closed, maintaining a clean and modern aesthetic.
