

Turned Pilasters

Information

Turned Pilasters are used to create features in a run of kitchen units or used to legs on islands and peninsulars, they can also be used to great effect as a breakpoint when a change in unit depth or breakfront is planned. The finish will be the same as the kitchen range chosen but styles may vary.

Specification

Colour matched to door finish.
Various sizes available.
No fixings supplied.

Fitting Instructions

The fitting of a Turned Pilaster will be determined by the construction of the chosen model, this will differ from range to range. The layout of the kitchen units will also mean that the Post or Pilaster will need to be cut onsite to give the best possible finish.

Special Notes

Measure twice, cut once!
